| Maximum Marks | 2 Marks                                      |

**Proposed Solution Template:**

Project team shall fill the following information in the proposed solution template.

| S.No. | Parameter                                | Description                                                                                                                                                                                                  |
|-------|------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1.    | Problem Statement (Problem to be solved) | Manual metro ticket booking causes long queues, delays, and inconvenience for passengers. The project aims to automate metro ticket generation with a fast, secure, and user-friendly digital system.        |
| 2.    | Idea / Solution description              | Develop a ServiceNow-based Metro Ticket Generation System where users can select source and destination stations, generate digital tickets, calculate fares automatically, and receive booking confirmation. |
| 3.    | Novelty / Uniqueness                     | Provides automated fare calculation, digital ticket generation, reduced waiting time, and centralized ticket management through a single platform.                                                           |
| 4.    | Social Impact / Customer Satisfaction    | Improves passenger satisfaction, minimizes queue congestion, enhances travel convenience, and supports paperless ticketing.                                                                                  |
| 5.    | Business Model (Revenue Model)           | Revenue through metro ticket sales, premium travel passes, digital advertisements, and partnerships with payment gateways.                                                                                   |
| 6.    | Scalability of the Solution              | Can be expanded to multiple metro networks, mobile applications, QR-code ticketing, smart cards, and real-time analytics.                                                                                    |
